

The graph displays the performance of different scale values (0.2 to 0.8) over 140 epochs. The y-axis represents a performance metric (likely accuracy or loss) and the x-axis represents the epoch number. The legend indicates that Scale 0.2 is blue, Scale 0.3 is orange, Scale 0.4 is green, Scale 0.5 is red, Scale 0.6 is purple, Scale 0.7 is brown, and Scale 0.8 is pink. The graph shows that Scale 0.7 generally achieves the highest performance, followed by Scale 0.8, Scale 0.6, Scale 0.5, Scale 0.4, Scale 0.3, and Scale 0.2.
